An art exhibition and a robot show are to be held on Sunday, and your friend David asks you which one he should go to. Write an email to

1) make a suggestion and

2) give your reason(s)

You should write about 100 words on the ANSWER SHEET.

Do not sign your own name at the end of the letter. Use "Li Ming" instead.Do not write the address.(10 points)

Dear David,

I'm very glad to receive your letter. I heard that you're trying to decide between attending an art exhibition and a robot show on Sunday. I recommend the robot show. Here are some reasons.

Firstly, I believe that the robot show will cheer you up because you are always interested in the latest technology. The art exhibition may not cheer you up so much as the robot show does. Secondly, according to the introduction, a lot of new artificial intelligence machines will be introduced, including smart homes and intelligent healthcare. I’m sure you’re eager to see these technologies in action and wouldn’t want to miss the opportunity.

I hope you will find the above-mentioned useful. Enjoy your weekend!

Yours sincerely,

Li Ming

我很高兴收到你的来信。听说你正在犹豫周日是去看艺术展览还是机器人展。我推荐你去机器人展。以下是我的一些理由。

首先，因为你总是对最新技术充满兴趣，所以我认为机器人展会让你感到振奋。艺术展可能不会像机器人展那样让你感到兴奋。其次，根据介绍，展会将展出许多新型人工智能机器，包括智能家居和智能医疗设备。我相信你一定迫不及待想看到这些技术的实际应用，并且不想错过这个机会。

我希望你觉得上述建议有用。祝你周末愉快！

Dear David,

I have received your email and learned about your dilemma. It's really difficult for one to choose between the art exhibition and the robot show. But as your friend, I will give you some suggestions.

英语二·写作·Part A·高分范文

Personally, I believe that the robot show may be a better choice for you. Firstly, since you're always enchanted by latest technologies and sophisticated devices, the art exhibition may not cheer you up so much as the robot show does. Secondly, from the brochure we know, a series of unprecedented applications of latest technology in household situations will be introduced during the show, including the robot servant with in-built AI chips and the completely automated household kitchen with skillful robotic arms. Inquisitive as you are, you may never wait a second to witness how they work. Therefore,I strongly recommend that you go to the robot show.

I really hope my suggestions will be useful. Wish you a nice trip this weekend!

Yours sincerely,

Li Ming

我收到了你的电子邮件，了解了你的困境。在艺术展和机器人展之间做出选择真的很难。但作为你的朋友，我会给你一些建议。

就我个人而言，我相信机器人展对你来说可能是一个更好的选择。首先，由于你总是被最新的技术和复杂的设备所吸引，艺术展可能不会像机器人展那样让你高兴。其次，从我们所知道的宣传册中，我们将在展会期间介绍一系列前所未有的最新技术在家庭中的应用，包括内置人工智能芯片的机器人仆人和拥有熟练机械臂的完全自动化家庭厨房。你是个爱探究的人，你可能永远不会等一秒钟来见证它们是如何运作的。我强烈建议你去看机器人展。

我真的希望我的建议能对你有所帮助。祝你这个周末旅途愉快！

英语二写作模板·Part B·高分范文

There are several factors contributing to the increasing health literacy level. First and foremost, the advance of technology ensures easier access to information for all residents. One decade ago, sending for a doctor appeared to be the only approach to gathering healthcare information, which was trustful, but took time and efforts. Now with the Internet pouring tons of information to our mobile phone every second, one can have a general idea about his or her own physical condition merely through several clicks of online search. Secondly, Chinese residents are now taking a more scientific approach to healthcare. The practice of resorting to some elixirs sounds passe, and people are now increasingly aware of the significance of medical science. In other words, we are wiser.

英语二写作模板·Part B·高分范文

To summarize, the rise in health literacy level seems to be an irreversible trend. With the advance of technology and efforts by the government, it is predictable that all residents, whether in urban or rural areas, will enjoy a healthier life in the future.

英语二写作模板·Part B·高分范文

上述折线图生动地描绘了2012-2011年中国居民健康素养水平的变化。健康素养是指人们获得基本医疗保健信息和服务的能力，并以此为基础促进他们的健康状况，其覆盖率似乎比10年前更高。在过去十年中，所有居民中具有足够健康知识的比例保持稳定增长。2012年这一数字为8.8%，但到了2021年，这一数字达到了25.4%，这对所有居民来说都是个好消息。

有几个因素促成了健康知识水平的提高。首先，技术的进步确保了所有居民更容易获得信息。十年前，请医生似乎是收集医疗信息的唯一途径，这是值得信赖的，现在，随着互联网每秒向我们的手机涌入大量信息，人们只需点击几次在线搜索，就可以对自己的身体状况有一个大致的了解。其次，中国居民现在正在采取更加科学的医疗保健方法。求助于某些灵丹妙药的做法听起来已经过时了，人们现在越来越意识到医学的重要性。换句话来说，我们更聪明。

总之，健康知识水平的提高似乎是一种不可逆转的趋势。随着技术的进步和政府的努力，可以预见的是，所有居民，无论是在城市还是农村地区，都将在未来享受更健康的生活。

尽管有许多因素可能促成了这一趋势，在我看来，两个最重要的因素如下。首先，随着科学技术的发展，人们可以通过手机查找他们需要的一切信息。因此，人们更容易搜索到与健康相关的信息。其次，我们政府的宣传也发挥了重要作用。最后，随着社会的发展，人们的生活观念也发生了变化，越来越多的人开始关注自己的健康。换句话说，我们正在变得更聪明。

Although numerous factors may contribute to this trend, in my opinion, two foremost ones are as follows. Firstly, with the development of science and technology, people can look up everything they need through their mobile phone. Therefore, it is easier for people to search for information related to health. Secondly, our government’s propaganda also played an important role. Finally, with the advance of society, people's life concepts have also changed, and more and more are paying attention to their health. In other words, we are becoming wiser.

综合考虑上述所有因素，我们可以坚信这一既定趋势将在不久的将来继续下去。

Taking all the above factors into consideration, we can strongly believe that this established trend will continue in the near future.

图表提供了2012年至2021年期间中国公民健康素养水平变化的信息。基于数据，我们可以看到居民的健康素养水平从2012年到2015年缓慢增长，从8.8%增长到10.15%，而从2015年到2021年则急剧增长，从10.15%增长到25.4%。

综合考虑上述所有因素，我们可以坚信这一既定趋势将在不久的将来继续下去。

The chart provides data about the health literacy level of Chinese residents from 2012 to 2021. Some obvious changes of it can be observed during this period. As we can see from the chart, the proportion of residents with basic health literacy rose slightly from 8.80% to 10.25% from 2012 to 2015 and rose dramatically from 10.25% to 25.40% from 2015 to 2021.

What exactly contributes to this phenomenon? It is a thought-provoking question. From my perspective, two foremost factors are as follows. Firstly, in recent years, China has witnessed rapid economic growth and great rise in living standards of the people. Therefore, for the individuals, there is a growing desire to maintain and promote their own health. In other words, the strong demand from the public in health management is one of the key stimuli to this dramatic change. Secondly, the health education and publicity industry has been expanding significantly in recent years to meet the needs of the consumers. Obviously, the rapid development of this industry also exerts a positive impact on the growth of residents' health literacy level.

Taking the above factors into consideration, we could strongly believe that this established phenomenon will continue to exist.

英语二·写作·Part B·首段解释专有名词版·难

The line chart vividly depicts the change in Chinese residents' health literacy level from 2012 to 2021. Health literacy, which refers to people's ability to access basic healthcare information and services, and to promote their hearth condition based on them, seems to have a higher coverage than 10 years ago. The proportion of those with adequate health literacy among all residents has kept growing stably in the last decade. In 2012, the number was 8.8%, but when it comes to 2021, it reached 25.4%, which is a good news for all residents.
